We provide solution to all kinds of pests like

- Rodents [Rats, Mice etc]
- Cockroaches and Ants
- Lizards
- Spiders
- Termites
- Mosquitoes and Flys
- Bees and Wasps
- Insects and bugs

DelmanExpert Services Pvt Ltd

DELMANEXPERT
Pest Control Expert

How we Operate

- We Initially start off by inspecting the entire property , observing all the indoor and outdoor spaces.

- We then discuss with the clients on what are the major concerns they are facing and study the cause behind it.

- We then formalise the chemicals according to the requirement and decide on what kind of treatment needs to be given.

- A detailed plan is given to the client on how many treatments are required periodically and the effect of the same. Depending on our clients work environment we schedule the date and time at which our technicians will visit the property .

- Our experienced technicians will come fully equipped and render the service by spraying the chemicals in and around the property, in such a way that its neither hazardous to the employees or the surrounding environment .

- The chemicals we use are approved by WHO and certified as 100% safe to everyone. We have all the required licences to render the service . In our 25 years of experience we have never misused , harmed or posed threat to anyone with our service.

- Once the treatment is given , our supervisors will come for periodic checks to observe if there are any other sources through which the pests are entering the property, and give a detailed analysis of the same to take further steps on eradicating the issue.
